La Colombe Replica

Description: The project I've chosen to take on is replicating the landing page of the La Colombe(https://www.lacolombe.com/). This project will involve using a lot of components we've learned over the past few weeks and probably some of the components we'll be learning week three.

Components

- Cards
- mt, mb, ml, mr
- Media classes
- The navbar, navbar toggler, data-toggle="collapse"
- Form group
- Bootstrap icons and fa icons
- 4 separate rows in the main content container.Potentially 5 depending on how I want to tackle the Brew the best background.
- Unsure about how to deal with that other than using img-fluid. But at the same time it could just be the background to a row if that's possible.
- Carousel
- The footer will use the bootstrap icons for the social media links. I see one row for the footer and about 7 columns. one empty col on each side and 5 columns of content.
